

ACUCLEAN - T

WORKPLACE TO DE-CAST AND CLEAN

Description

The **Acuclean-T** consists of the table rack, the tub, 2 shelves as well as the back and side covers. The whole Acuclean-T is manufactured from polished, high-quality stainless steel.

The following 5 models are offered:

1. Acuclean-T existing as described above.
2. Acuclean-TT consisting only of the tub in the upper display space, which can be placed on a work bench.
3. Acuclean-T/TT existing as described above, including the Decast 600 unit.
4. Acuclean-T/TT existing as described above, including the ultrasonic cleaning equipment.
5. Acuclean-T/TT existing as described above, including the Decast 600 unit and ultrasonic cleaning equipment.

Application

The Acuclean-T and TT are used as work stations in connection with production machines. For example, as a work station for de-casting and cleaning of wire-honed work pieces and the arbors (clamping systems).
