SCHLÄFLI
Schlafli Engineering LTD

Small company – Great performance

20 years of Schläfli Engineering LTD

Dear business associates

Schläfli Engineering LTD was established on 28th March 1990. The company's core competence relates to development and production of special-purpose machines for internal and external machining of precision parts made of materials ranging from steel through to diamond. Over the years the Schläfli team has managed to position the company with its not everyday technologies on the world market.

In the future as well, we will be driven to meet the individual wishes and needs of you, valued customers, in the shortest possible time in the usual, reliable way. We continue to assist you at any time should you have any questions or suggestions.

In order to enable you as well to benefit from our success, we are granting you an **anniversary discount of 10%** on machines, spare parts and consumables during the whole month of March 2010.

Because not least: It is primarily thanks to our loyal customers that we are able to look back on 20 years of successful company history.

Thank you!

Schläfli Engineering LTD
The Company Management

Hans-Rudolf Schläfli
