

WIRE FORM 2000

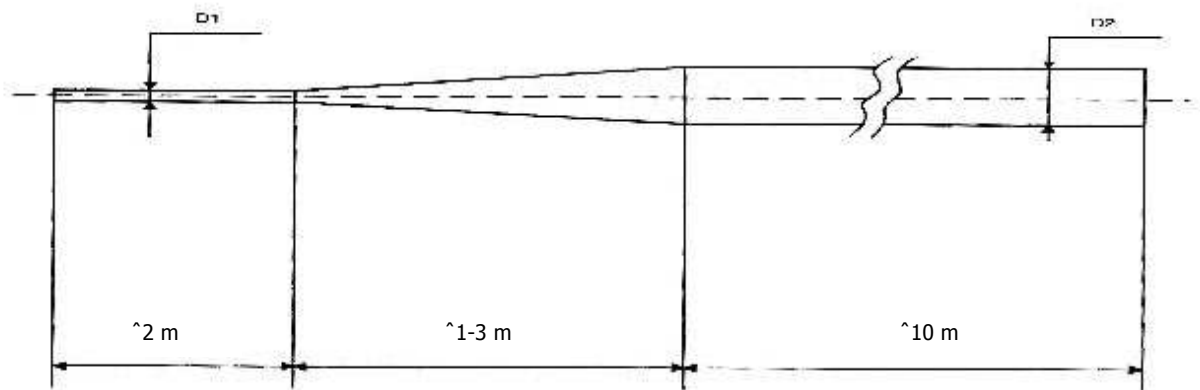

AUTOMATIC WIRE ETCH MACHINE

Description

The wire form 2000 forms each wire with acid into three sections. A cylindrical section with the smallest diameter, a tapered section and a second cylindrical section with a diameter the same size as the finished hole. These wires are used in the unique honing process on the Fine Hone 250 and Fine Hone 600.

Technical data

Range of O.D. to be processed	0.05 – 0.30mm
Air pressure	min. 4 bar
Dimensions (LxHxD)	1500x800x1800mm
Net Weight	120Kg
Command power	24 VDC
Supply voltage	220 VAC/50-60Hz

All technical specifications and illustrations are without obligation and subject to change without notice.
